Body

- PolyBilt™ copolymer body with transverse storage to the front
- Integral 400-gallon water tank (25-gallon foam tank)
- 6 large compartments with roll-up doors (right rear compartment has booster reel)
- Enclosed slide in suction hose storage compartments
- Roll-up door at back covering the rear-mounted Mongoose CAFS pump
- LED strip lighting in all compartments
- LED Warning Light Package

This multipurpose emergency response vehicle on the Ford F550 platform features the Super Single tire and wheel package and a mobile firefighting CAFS pump. It serves as an initial response/squad/mini pumper, capable of handling car accidents and brush or grass fires. The Darley Light Tactical Pumper offers excellent all-weather, off-road capability with pump n roll and an LED warning light package. Its corrosion-free body provides ample compartment space for lifesaving equipment, suitable for difficult-to-access homes, congested public gatherings, highways, farm fields, and off-road recreational areas. The body includes a transverse area for storing a backboard and long-handled tools, accessible from either side of the vehicle's front compartments. The 100-150' booster reel in the right rear compartment deploys out the back. The front bumper is equipped with a joystick-operated, remote-controlled front bumper turret, along with dual front spray nozzles adjustable for various flows and spray patterns, usable individually or together.

Features

- Increased ground clearance for excellent off-road performance
- Single rear tire improves traction in most terrains (mud/snow/sand)
- 7200 lumen LED driving lights
