

# FLIR Scout Pro

**The FLIR Scout Pro is the next generation of FLIR thermal monoculars, specifically designed for time-critical frontline deployment.**

Developed in collaboration with law enforcement and public safety professionals, the FLIR Scout Pro's intuitive design provides extended 500m detection range and a 32° FOV lens.

When seconds matter – its streamlined user interface and info system ensures live image visibility and continuous focus on observed objects, persons or areas without obstruction and confusion of menus and settings.

Robust by design, with the confidence of market-leading product quality specifications and a 5-year warranty. Scout Pro ensures the highest professional standards and performance in every frontline response.

## Key Values

### 1. Streamlined Interaction

- Simplified, intuitive, and efficient live image interface for continuous focus on observed objects and areas
- App based image streaming for covert operation
- Toggle feature for efficient zoom, mode selection, and brightness adjustment with one-click standby option
- Wireless streaming to app solution minimizing gallery, image/video management, and wireless file transfer

### 2. Mission-Critical Reliability

- Market leading robust and compact design with 2m drop and IP67 classification to withstand operational environments
- 6-hour battery life and USB Type-C connector and powerbank charging options
- Video and still images for evidence and documentation

### 3. Optimized for Efficient Human Detection

- Image optimized for human and anomaly detection, utilizing DDE and additional unique FLIR image-enhancing technologies
- 32° FOV wide lens for faster and more efficient search, surveillance, and area sweep, capable of detecting human signatures up to 500 meters
- Dual eyecups sizing for optimal fit and light pollution prevention

Protective Pouch
