

# HOW TO FOLD

**1** Lay the **DRY** car fire blanket flat on the ground.

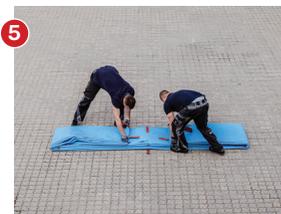

**2** Ensure **TWO** people are available to assist with folding.

**3** Fold the blanket starting from the blue handle side in a zigzag pattern, from one end to the other.

**4** Tuck the blue handles inside the folds and leave the red ones visible.

**5** Fold the blanket in half from both ends, leaving a small gap in the middle.

**6** Roll the blanket from both ends toward the middle until both sides meet.

**7** Secure the rolled blanket using the Velcro belt.

**8** Store the blanket in a dry, clean environment, preferably in its original packaging. **Do not place any load directly on the blanket**

**9** Keep away from direct sunlight or chemicals that might degrade the blanket's integrity.

**10** Perform a visual inspection at least once every 12 months when the blanket is not in use. **If the blanket shows significant wear, tears, or damage, replace it immediately.**

**BY FOLLOWING THESE STEPS, YOU ENSURE THE FIRE BLANKET IS SAFELY AND PROPERLY HANDLED, MAINTAINED, AND READY FOR THE NEXT EMERGENCY.**
