

# Launch Pad Light Kits

by **HOODMAN**®

Hoodman Launch Pad Light Kits are an easy way to illuminate your home base. The battery operated LED light kit will operate for over 50 hours on 2 AA batteries. Set up by affixing the power pack to the Velcro patch sewn into the West compass mark of your Hoodman Orange Drone Launch Pad. Next, string the light cord through the loops sewn at the perimeter of the Launch Pad. Light Kits have 3 settings: Continuous On, Flashing and Quick Flashing. Low-level green lights improve vision detail and clarity without shutting down your night vision pupil dilation. FAA Heliport lights are green for the same reason.

Model	Description	Dealer Net	Retail	UPC
HULTKIT	Fits 3Ft & 5Ft Pads	\$14.99	\$19.99	017932 335438
