The Hang-Dry is a genius step in reducing unneeded costs in the fire service. We utilize the hangers to air-dry our structural firefighting garments without the use conventional dryers or the use of expensive specialized drying cabinets. For a fraction of the cost we can dry our safety garments in a simple low-tech manner without having to spend thousands of dollars. A definite plus for the taxpayers and firefighters.

Jim Topoleski, Battalion Chief at Redlands Fire Department, CA.

We dry!

Fire & Rescue PPE
