

# SLR

## Beacon

### FEATURES

- LED rotating beacon with (12) high-powered LEDs
- Low-Amp draw compared to halogen rotating beacons
- 75/90/120 RPM
- 12/24 Vdc

### APPROVALS

- SAE J845 Class 1
- CCR Title 13

### FS TECHNOLOGIES

SLR beacon combines traditional rotating technology and LEDs in one unique package. Utilizing Federal Signal's patented Solaris® LED reflector technology, this beacon packs an unmatched warning signal suitable for various large vehicle applications such as DOT, construction, utility operations, and fire trucks.

#### Low Amp Draw Minimizes Demands On Vehicles

Compared to traditional 12 Vdc halogen rotating beacons, the Federal Signal SLR beacon operates on about half the Amp draw. This encourages vehicle efficiency while maintaining superior warning for work zone safety—SAE J845 Class 1 versions are available.

#### Flexibility All In One To Fit Many Applications

The Federal Signal SLR beacon has (3) rotating speeds built-in to every unit, so users have the flexibility to choose from 75/90/120 RPM. Each SLR beacon also can operate on either 12 or 24 Vdc work trucks.

#### Built To Meet The Demands Of Tough Work Environments

SLR beacon is powered by a gearless motor that encourages extended product durability.
