

PORTABLE LIGHTING TOOLS

FOR THE CONSUMER

THE KEY TO EFFECTIVE EMERGENCY PLANNING

NANO LIGHT®

This truly tiny, personal flashlight is ideal for carrying on your key ring or storing in your pocket, glove compartment, purse, backpack, or tool bag. At less than 2 inches long you can conveniently carry it with you at all times.

- Non-rotating snap hook attaches to key rings, zippers, backpacks, clothing, etc.
- White LED delivers 10 lumens; runs 8 hours
- Anodized aluminum construction
- Includes 4 alkaline button cells (included)
- 1.47"; .36 oz.

AT HOME:

Keep it in your bedside table for easy access. It provides a bright beam so you can check on your family when the power goes out. At less than \$12, everyone in the family can have one without breaking the bank.

IN YOUR CAR:

Since it attaches to your key ring, you can rest assured that you will always have it with you. Use it to search your glove compartment or read a map.

AT WORK:

Store it in your desk drawer for easy access, or keep it on your key ring or coat zipper, so you can grab on the way out should you need to evacuate the building.

- #73001 Nano Light - Black
- #73002 Nano Light - Blue
- #73003 Nano Light - Pink
- #73005 Nano Light - Red

With the summer storm season upon us, it's wise to plan for emergencies resulting in a major power loss due to extreme heat, hurricanes, tornadoes, or lightning strikes. Under severe weather conditions like these, having a "disaster supply kit" is essential. The Center for Disease Control's (CDC) website has a list of recommended items to help you prepare an emergency preparedness kit, including a flashlight. Streamlight's The Siege®, Waypoint®, and PolyTac® are ideal lighting tools to have on-hand in your home, your car, as well as at the office.

AT HOME:

The **THE SIEGE** provides the security of bright light for your family with 360° of illumination. It's cost-efficient with a 12-day run time on low and uses affordable, easy-to-find alkaline batteries. It's lightweight and portable so you can carry it with you to your family's planned escape route, to check on your property, or to check on your neighbors.

The **WAYPOINT**, available in both alkaline and rechargeable models, features a far-reaching beam so you can check the attic or basement before going all the way in. An integrated stand lets you set it down for hands-free use. Multiple modes let you choose between bright light and longer run times.

The **POLYTAC** uses two 3V lithium batteries with a 10-year shelf life so you can rest assured that you'll have a light when you need it. They're compact so you can store them within easy reach in your night stand. They're affordable, so everyone in the family can have one.

IN YOUR CAR:

If you're stranded in your car, **THE SIEGE** is a handy tool to have in your preparedness kit along with your jumper cables. It's rugged, compact (it won't take up a lot of room in your trunk), and it features an SOS function (with red light) to signal for help.

The **WAYPOINT** features an integrated stand so you can set it down and still have light to change your tire or check the radiator. Multiple lighting modes give you the option of a bright, far-reaching beam or longer run times to conserve battery life. Emergency signal function alerts others to your location.

POLYTAC is compact so it won't take up a lot of space in your glove box. Two 3V lithium batteries can withstand temperature extremes so you can be confident that the light will shine after a cold winter. It's also waterproof so if you need to change a tire in the rain, your flashlight will be the least of your worries.

AT WORK:

The **THE SIEGE** lantern is convenient when it becomes necessary to move about a facility to power down or disconnect critical equipment, retrieve sensitive documents, or guide employees through remote areas lacking adequate backup lighting.

The **WAYPOINT** produces a long-range beam that reaches into hard to access areas such as the warehouse ceiling that you're checking for leaks or a damaged light. It also features a weight-balanced design that won't tire you out while making your inspections.

POLYTAC is compact so you can store it in your desk drawer. It uses two 3V lithium batteries with a 10-year shelf life so you can rest assured that you'll have a light if you need to evacuate the building.

Visit the CDC's website at www.emergency.cdc.gov/preparedness/kit/disasters for more information on putting together your kit.

When the light goes out, you can depend on Streamlight to light the way in darkened conditions. Streamlight also offers headlamps for hands-free use. Visit www.streamlight.com for our full offering of headlamps, non-rechargeable and rechargeable products.
